Bachelor of Science in Information Technology

Overview of the Practicum Engagement

Company Background

Figure 1. Kooapps Logo

Kooapps is an indie mobile gaming studio and publisher established in 2008, with its headquarters located at 12400 SE 38th Street, Bellevue, Washington. The company was founded by Chun-Kai “CK” Wang, Johnathan Chang, and Stephanie Cheng, three colleagues from Stanford University whose vision was shaped by the release of Apple’s Software Development Kit that same year. Their original concept was to develop an SAT flashcard application for the iPhone, a project that eventually grew into the studio now known as Kooapps. The name is derived from the phrase “Cool Apps” which reflects the founders’ intent to create games and apps that were entertaining and trendsetting.

In 2009, Solon Chen co-founded Kooapps Philippines Corporation, establishing the company's branch in Makati City. This office is responsible for game development, quality assurance, and creative production in support of the applications and games published under the Kooapps name. The company's guiding philosophy, "We make games we want to show our friends," reflects its vision of establishing a globally recognized Filipino gaming brand.

Mission

"To connect the world through amazing daily experiences."

Vision

“Build the first global Filipino gaming brand, one the entire country will be proud of.”

Nature of Assignments or Tasks Given

My position during my internship at Kooapps Philippines Corporation was Quality Assurance (QA) Intern. As a QA intern, I was tasked with testing applications, logging and documenting bugs identified during testing, and performing additional QA tasks such as verifying bug fixes and conducting research on trends within the game development industry. These tasks were aimed at ensuring that applications were free from bugs that could negatively impact the user experience while supporting the development team by providing accurate bug reports and contributing research that could help improve application development.

As the final requirement of my internship, I was tasked with completing a special project. My groupmates and I agreed on producing a feasibility study centered on Qase, a QA management platform built around the idea of housing everything, tools, testing stages, documentation, in one cloud-based system. Going into the research, I kept running into the same underlying issue: most QA workflows end up scattered across several disconnected tools, which slows things down and adds friction between stages. That became the angle I wanted to dig into, whether folding everything into a single platform could cut that friction and make the process more efficient. Out of the QA tools we considered, Qase ended up being the strongest candidate simply because its feature set covered more ground than the alternatives, which is what pushed our group to build the study around it.

Total Hours Rendered

The table below presents a summary of the different phases of my internship at Kooapps Philippines Corporation and the corresponding number of hours rendered for each phase.

Table 1. Summary of Hours Rendered

Training Phase	Training Description	Total Hours
A	Company Orientation	8
B	Quality Assurance Training	40
C	Quality Assurance Testing, Technical Documentation & Additional Related QA Tasks	238
D	Special Project Development	200
Total		486

Over the course of my internship, my hours were distributed among four phases. The first 8 hours were allotted to Company Orientation, which introduced me to the organization's policies, internal structure, and general expectations for interns. This was followed by 40 hours of Quality Assurance Training, during which I acquired the technical foundation I needed to test application builds accurately. The largest portion of my time, 238 hours was dedicated to hands-on QA activities which included application testing, technical documentation, bug verifications, and other related QA responsibilities. The final 200 hours were devoted to completing our special project, which involved evaluating a QA tool and compiling the results into a feasibility study as our final internship requirement.

Presentation of Output

Due to the Non-Disclosure Agreement (NDA) governing my internship at Kooapps Philippines Corporation, internal documents, bug reports, test cases, screenshots, and other proprietary materials cannot be included in this report. The following discussion therefore provides a detailed but general account of the outputs and responsibilities I carried out during the internship without disclosing confidential company information.

Over the course of the internship, I was assigned recurring testing tasks that followed a consistent weekly cadence, including Scheduled Testing, Priority Testing, Ads Checking, and Weekly GPP Testing, in addition to Bug Fix Confirmation tasks whenever developers submitted resolutions to previously logged defects. Through this process, I tested multiple mobile applications across different platforms, logging defects related to gameplay mechanics, user interface behavior, advertisement integration, and other functional issues. Each defect was documented in a standardized format to help developers quickly understand, reproduce, and resolve the reported issue.

Beyond the usual testing, I also contributed to my team's special project by researching and evaluating third-party QA tools and workflow solutions. This research supported the feasibility study on Qase, which examined how consolidating multiple QA tools into a single, centralized, cloud-based platform could reduce context switching and streamline our overall testing and documentation process. The study involved comparing our existing tools against the features offered by Qase and assessing the practicality of transitioning to the new platform.

Software Used

The company relies on a third-party communication platform for coordinating daily work assignments, sharing announcements, and communicating updates across teams. This platform served as my main channel for identifying the day's testing tasks, tracking updates on previously reported bugs, and staying informed of changes within the company.

A third-party task management tool is likewise used for creating tickets that specify which application is to be tested, the platform and version involved, and the relevant changelogs for the newest update. This tool also links to the spreadsheets where I logged and documented testing findings and bug reports.

The company additionally uses a third-party QA support tool that provides testing-related information relevant to the application under evaluation, helping ensure that application behavior aligns with the expected functionality described in each assigned task. For my special project, my teammates and I specifically evaluated Qase, a cloud-based QA test management platform, as a potential tool for consolidating our testing, documentation, and communication workflow into a single system.

Hardware Used

Testing was carried out across a range of devices, including smartphones, tablets, and laptops, allowing me to check how applications performed and displayed across different screen sizes and device types. Having access to multiple devices was essential for catching issues that might only appear on certain hardware, ensuring that builds were tested under conditions similar to what actual users would experience.

Screen of the Features

Since screenshots and other visual materials cannot be included due to the NDA, this section instead describes, in general terms, the types of screens and features I regularly tested throughout my internship. A significant part of my testing involved main gameplay screens, where I checked the core gameplay loop, control responsiveness, and scoring or level-progression systems to confirm everything functioned as expected after each build update. I also tested menu and navigation screens, including home screens, settings menus, and level-select interfaces, making sure buttons, transitions, and layouts rendered correctly and consistently across different devices. In addition, I regularly checked advertisement placements within the applications to confirm that ads displayed at the correct points in the user experience and dismissed properly without disrupting gameplay.

Synthesis of the Practicum Engagement

Learnings

My internship at Kooapps Philippines Corporation gave me insight into the practice of Quality Assurance. Over the course of the internship, I developed the ability to test mobile applications systematically, following structured processes for scheduled testing and priority testing, while documenting findings in a clear and organized manner. I also learned firsthand how something as small as a mistimed advertisement or an inconsistent UI element can quietly undermine an application's overall quality.

Confirming bug fixes repeatedly also drilled in the importance of thoroughness, retesting each bug under its original conditions was the only reliable way to confirm that a fix worked. Alongside that, my groupmates and I relied heavily on clear, timely communication throughout both routine testing and the Qase feasibility study, an experience that noticeably sharpened my communication skills.

Realization

The practicum made it clear for me that every professional role comes with its own demands, no matter how straightforward it looks on paper. Identifying bugs might be the most visible part of QA work, but doing it well actually comes down to persistence and a keen eye, along with solid communication, staying on top of every assignment, update, and ongoing project mattered just as much as the testing itself.

One realization that stuck with me had to do with workplace communication, and it came from a mistake on my own end. At one point, I let a colleague submit a request to our supervisor on my behalf instead of raising it myself. My supervisor handled it professionally but made it clear that every worker and intern is expected to raise their own requests directly, not through someone else. It was a fair callout, and it taught me to take ownership of my own concerns instead of letting someone else carry them for me, especially in a workplace setting where that kind of thing reads as unprofessional.

On a more personal note, the internship also showed me how much commitment a job demands. The commute to the office alone took a while and was honestly exhausting, so I had to get up

early and plan my whole morning around making it on time. It wasn't always easy, but it pushed me to be more disciplined and punctual than I probably would've been otherwise.

Conclusion

Overall, my internship at Kooapps Philippines Corporation turned out to be a genuinely good experience, not just for the technical side of things, but personally too. I got to build real rapport with some of the other interns, and having people around who made the day-to-day less monotonous made a real difference. Beyond the QA skills I picked up, the internship gave me a clearer sense of what it takes to be a solid IT professional, which is staying attentive, adapting when things don't go as planned, and communicating well with the people around you. Looking back, this practicum did more than prepare me for a QA role specifically, it gave me a real feel for what working in a professional environment is actually like, on top of the technical exposure I came in hoping to get.

Endorsement Letter

16 April 2026

Blessie Berunio
HR Admin
Human Resources Department
KooApps Philippines
1272 Batangas St., San Isidro, Makati City

Dear **Ms. Blessie**,

The B.S. in Information Technology program of Mapúa Malayan Colleges Laguna requires their students to undergo Practicum program for a minimum of **486** hours in an academic calendar that will prepare our students to be job-ready after completing their curriculum. This program intends to enable our students to acquire and practice the knowledge and skills expected of a graduate of a B.S. IT program which, in turn, would guarantee continuous supply of IT professionals needed by your company.

We believe that your company can provide the relevant exposure necessary for our students to achieve the intended learning outcomes for the B.S. in Information Technology program. In this regard, I would like to endorse **Mr. Lorenzo T. Okol** to have his practicum activities in your company as requested.

We thank you for your confidence and trust with us and we look forward to a more meaningful linkage that is mutually beneficial to our students and your company.

With warm regards,

ADOMAR L. ILAO, DIT

BSIT Program Chair

Liability Waiver

MAPUA
MALAYAN COLLEGES
LAGUNA

REVISION NO.: 60
REVISION DATE: May 10, 2016

STUDENT TRAINING AGREEMENT AND LIABILITY WAIVER

IMPORTANT INFORMATION

- THIS FORM IS TO BE ACCOMPLISHED AND SUBMITTED BY STUDENT TRAINEE TO THE PRACTICUM ADVISER BEFORE STARTING THE PRACTICUM.
- READ AND UNDERSTAND THE PROVISIONS OF THIS AGREEMENT AND WAIVER.
- ENSURE THAT ALL SIGNATORIES SIGN THE FORM.

I, Lorenzo T. Oro, and a student of MALAYAN COLLEGES LAGUNA (hereinafter referred to as "MCL", do hereby voluntarily undergo on-the-job training at Koo Apps Philippines Corporation, hereinafter referred to as the "Host Company", located at Marikina City, under the following terms and conditions:

a. That the practicum training will commence on April 20 and ends on July 13 and will have to complete a minimum of 486 hours required for the on-the-job training;

b. That I shall observe proper decorum and act professionally at all times and abide by the Company's rules and regulations and comply with those imposed for the training program, otherwise, I shall be excluded from further participation;

c. That in the course of my training program, I may have access to information which may be of confidential in nature and proprietary to the Company, for which I may be required to execute a confidentiality and non-disclosure agreement as a prerequisite to my participation in the training program;

d. That the time I will spend on the training program in the completion of my on-the-job training requirements will not and should not be interpreted or construed as working hours and should be regarded as non-compensable. Provided that, the Company may, as a unilateral act of liberality or generosity on their part, provide me with meal, travel, transportation allowances, accommodations, etc.;

e. That I fully understand that notwithstanding the allowances enumerated in the preceding section which I may receive, there exists no labor-management and/or employer/employee relationship between me and the Company where I will undergo my training;

f. That I shall exercise due care and diligence in the tasks assigned to me and personally be made answerable for any and all liabilities for damage to property or injury to third person, which may be occasioned by my intentional or negligent acts during the course of my on-the-job training;

g. That I shall likewise hold the Host Company and MCL free and harmless from any and all liability and responsibility for any sickness or injury to myself and third parties and damage to property which I may sustain and/or may occur at any time during the training program, including time spent in traveling to and from any and all premises and locations where I may be required to go to as part of my training program;

h. That the Company reserves the right to discontinue my training on reasonable grounds upon written notice to MCL and myself. Additionally, in the event my training program is discontinued for reasons attributable only to myself, I may be made to reimburse the Host Company for any/all the allowances, stipends, etc., which I may have received from them during and prior to the termination of my training program;

i. That in addition to my liability under section g and for the pre-termination of my training program provided for under section h hereof, I may be subjected further to disciplinary action in accordance with the school's student manual and/or be a ground for disqualification from graduation;

Signed on this April day of 24, 2026

		Company Orientation Quality Assurance Training Quality Assurance Testing Technical Documentation Additional Related QA Tasks
TASK	Company Orientation Quality Assurance Training Quality Assurance Testing Technical Documentation Additional Related QA Tasks	SHIFT/TIME
		7:00 AM to 4:00 PM

Company Orientation

April 20. Set up accounts, attended the orientation presentation, wrote a short self-introduction, toured the office, and reviewed company documents.

Quality Assurance Training

April 20. Went through the QA role overview and began testing the company's games by trying to break them to find bugs.
 April 22. Learned about Scheduled Testing, Ads Checking, and Priority Testing, and how priority tasks take precedence over other tasks.
 April 23. Continued learning Ads Checking, Scheduled Testing, and Priority Testing, covering proper reports and acceptable ads.
 April 24. Grew more confident in Ads Checking and Scheduled Testing, and began understanding how priority tasks differ from Scheduled Testing.

Quality Assurance Testing

April 22. Ran Scheduled Testing on an assigned game, performed a monthly ads check, and handled two priority tasks, finding a localization error and a level functionality issue.
 April 23. Did a monthly ad check, worked on two priority tasks finding a build stability issue and a UI clipping bug, and ran Scheduled Testing on two apps with no bugs found.
 April 24. Performed multiple Scheduled Testing sessions, did a monthly ads check, and handled two priority tasks, reporting and reproducing multiple bugs.

Technical Documentation

April 22. Documented the two bugs found during priority testing in the issue sheet.
 April 23. Documented the UI clipping bug found during priority testing, including reproduction steps.
 April 24. Documented a flagged ad and a UI bug discovered during Priority Testing.

Additional Related QA Tasks

April 22. Performed Scheduled Testing on an assigned game and started monthly ads checking, cut short by a priority task.
 April 23. Performed a monthly ads check and Scheduled Testing on two apps.
 April 24. Performed ads checking and multiple Scheduled Testing sessions.

DATE	April 27 – April 30, 2026	AREA ASSIGNMENT	Quality Assurance Training Quality Assurance Testing Technical Documentation Additional Related QA Tasks Special Project Development
TASK	Quality Assurance Training Quality Assurance Testing Technical Documentation Additional Related QA Tasks Special Project Development	SHIFT/TIME	7:00 AM to 4:00 PM

Quality Assurance Training

April 27 – Final training day covering Ads Checking, Scheduled Testing, Priority Testing, and a new log-viewing tool.

Quality Assurance Testing

April 27 – Ran Scheduled Testing, a fix retest, a Priority ad check/bug confirmation, and two more Priority Tasks (1 bug reproduced and documented, 1 clean).
 April 28 – Confirmed a bug fix and new features, verified April 22 bug reports as "Resolved," ran two Priority Tasks (ad check—no issues; reproduced bug), then closed with fix checks and two clean Scheduled Testing sessions.
 April 29 – Ran Scheduled Testing on three apps and Quick Checks on Banana Bunch (no issues found in any), closed with a clean Priority Task.
 April 30 – Ran Scheduled Testing on three apps (UI and ad-related bugs reported), two Priority Tasks reproducing known UI bugs, and a clean Monthly Ad Check.

Technical Documentation

April 27 – Documented a blocked ad and a reproduced NPC UI bug with full reproduction steps.
 April 28 – Marked a bug fix "Resolved" and a reproduced bug "Failed" in the device matrix.
 April 30 – Documented UI and ad-related bugs from Pictoword GP, reproduced UI bugs from two Priority Tasks, and an ad-related bug from Stacky GP.

Additional Related QA Tasks

April 27 – Performed Ads Checking, Scheduled Testing, and a bug confirmation task.
 April 28 – Performed Scheduled Testing with no irregularities observed.
 April 29 – Performed Quick Checks and Scheduled Testing, with no reportable bugs found.
 April 30 – Performed Scheduled Testing across three apps (bugs reported) plus a clean Monthly Ad Check.

Special Project Development

April 27 – Identified Qase as a strong candidate for test case management.
 April 28 – Explored Qase's core features and began studying feasibility studies.
 April 29 – Researched the advantages and disadvantages of Qase.
 April 30 – Built a Qase comparison table and started the Risk Assessment section.

TASK	Quality Assurance Testing Technical Documentation Additional Related QA Tasks Special Project Development	SHIFT/TIME	7:00 AM to 4:00 PM

Quality Assurance Testing

May 4. Ran two Scheduled Testing sessions, reporting UI and ad-related bugs, performed weekly store pass testing on Pictoword and Snake.io, and closed with a clean Priority Task.

May 5. Ran Scheduled Testing on Snake.io Web and Watch Pet iOS, a Priority Test on Snake.io iOS finding a localization error and an infinite loading bug, and a Priority ad testing task for Piano Tiles 2 iOS.

May 6. Ran Scheduled Testing on Stack iOS and Mr Jump, then four Priority Tasks covering Town Heroes GP, Pocket Family, Piano Tiles 1, and Solitaire.

May 7. Ran Scheduled Testing on Stacky Bird GP and a cut-short Mr Jump iOS session before reassignment to Priority Testing on Stacky Bird GP, Snake iOS, Solitaire iOS, and Pictoword GP.

May 8. Ran Scheduled Tests on Zendoku, Piano Tiles 2 GP, Watch Pet GP, Snake.io Web, and Snake.io CrazyGames, then Priority Tasks on Bottle Flip GP and Town Heroes GP.

Technical Documentation

May 4. Documented a UI bug on the reward progress bar, two ad-related bugs, and a currency inconsistency bug in another app.

May 5. Documented the infinite loading bug found in Snake.io iOS, later confirming the fix once resolved.

May 6. Documented the reproduced freeze bug from Town Heroes GP and two inappropriate ads from Piano Tiles 1.

May 7. Documented a currency inconsistency and ad bug from Stacky Bird GP, reproduced UI bugs from Priority Testing, an ad bug from Solitaire iOS, and ad and UI bugs from Pictoword GP.

May 8. Documented UI and ad bugs from Piano Tiles 2 GP, an ad bug from Watch Pet GP, a localization bug from Snake.io CrazyGames, and reproduced UI and localization bugs from Bottle Flip GP.

Additional Related QA Tasks

May 4. Performed Scheduled Testing, reporting five bugs, and weekly store pass testing on Pictoword and Snake.io.

May 5. Performed Scheduled Testing on Snake.io Web and Watch Pet iOS with no irregularities found.

May 6. Performed Scheduled Testing with no irregularities found; all tested games were stable.

May 7. Performed Scheduled Testing on Stacky Bird GP and Mr Jump iOS, finding issues only in Stacky Bird GP.

May 8. Performed Scheduled Testing on Zendoku, Piano Tiles 2 GP, Watch Pet GP, Snake.io Web, and Snake.io CrazyGames, reporting UI, localization, and ad-related issues.

Special Project Development

May 4. Continued researching for the feasibility study, documenting the pros and cons of Qase.

May 5. Continued research on Qase and feasibility study implementation.

May 6. Continued researching Qase and studying Technical, Financial, and Organizational Feasibility.

May 8. Continued writing the Qase advantages/disadvantages section and researched the Risk Assessment section.

TASK	Quality Assurance Testing Technical Documentation Additional Related QA Tasks Special Project Development	SHIFT/TIME	7:00 AM to 4:00 PM

Quality Assurance Testing

May 11. Ran Scheduled Testing on Zendoku GP and Microtown GP, Weekly GPP Testing across four apps, the Check High Risk Username task, and Priority Testing on Plano Tiles 2 iOS and IOS CN.
May 12. Ran Scheduled Testing on Snake.io GP, attempted reproduction on Solitaire iOS, Priority Testing on Solitaire iOS and Watch Pet GP, confirmed two prior bug fixes, and continued Checking High Risk Usernames.
May 13. Handled a Priority ad check for Solitaire iOS and reproduced an unreported bug.
May 14. Handled four Priority Tasks on Snake.io GP and Snake.io iOS, reproducing three bugs and recording launch time and file size.

Technical Documentation

May 11. Documented the boss fight bug, localization errors, end-screen UI bug, overlapping text bug, and oversized costume bug from the day's testing.
May 12. Documented the recurring prompt bug, inappropriate ad bug, and bug fix confirmation results for Bottle Flip GP.
May 13. Confirmed and resolved the recurring prompt bug and end-screen UI issue, and documented an additional reproduced bug.
May 14. Documented three reproduced bugs from Snake.io GP priority testing.

Additional Related QA Tasks

May 11. Performed Scheduled Testing, Weekly GPP Testing, and the Check High Risk Username task.
May 12. Performed Scheduled Testing, attempted reproduction on Solitaire iOS, confirmed bug fixes for Bottle Flip GP, and continued Checking High Risk Usernames.
May 13. Performed a Scheduled Test on Mr Jump GP and completed Bug Fix Confirmations.
May 14. Continued Checking High Risk Usernames, completing one batch and starting another.

Special Project Development

May 11. Continued writing the Qase advantages/disadvantages section and researched the Risk Assessment section.
May 12. Continued brainstorming for the feasibility study, explored Qase's features further, and read about technical feasibility.
May 13. Onboarded a new team member, redistributed tasks, and began studying Technical, Financial, Operational, Management, and Economic Feasibility.
May 14. Continued reading and studying feasibility study materials.
May 15. Completed the Operational and Technical Feasibility sections and continued reading up on Financial, Management, and Economic Feasibility.

TASK	Quality Assurance Testing Technical Documentation Additional Related QA Tasks Special Project Development	SHIFT/TIME	7:00 AM to 4:00 PM

Quality Assurance Testing

May 18. Handled Priority Tasks on Stacky Bird Amazon, reproducing and documenting an already-reported bug, and Piano Tiles 2 GP, finding no issues.

May 19. Handled Priority Tasks on Mr Jump GP and Pictoword GP, reproducing one bug and reporting a new one, plus event testing on Stacky Bird iOS, Pictoword iOS, and Stacky Bird Amazon, reproducing an already-reported bug.

May 20. Handled Priority Tasks on Snake.io GP, reproducing two already-reported UI bugs, and on Solitaire GP and Stacky Bird iOS, running testing and ad checks with no issues found.

May 21. Handled Priority Tasks on Pictoword iOS, Snake.io GP, and Pocket Family GP, finding no issues except a reproduced visual bug on Pocket Family GP, and Piano Tiles 2 iOS, running ad checks and reproducing a UI bug that triggered unintended buttons.

May 22. Handled Priority Tasks on Snake Arcade iOS and Snake Amazon, running usual tests plus live event testing with no irregularities found.

Technical Documentation

May 18. Documented the reproduced bug from Stacky Bird Amazon in the device matrix sheet.

May 19. Documented six reproduced bugs from Mr Jump GP, an ad-related bug from Pictoword GP, and a reproduced bug from Stacky Bird iOS.

May 20. Documented two reproduced UI bugs from Snake.io GP and recorded ad check results for Solitaire GP and Stacky Bird iOS.

May 21. Documented a reproduced UI bug from Piano Tiles 2 iOS, recorded ad check results for the same game, and documented a reproduced visual bug from Pocket Family GP.

Additional Related QA Tasks

May 18. Worked on Checking High Risk Usernames, Scheduled Testing for Stacky GP and Zendoku GP, an Ads Check for Top 50 Games, and the Weekly GPP Test on Snake.io GP.

May 19. Continued the Ads Check for Top 50 Games, nearly complete.

May 20. Continued the Ads Check for Top 50 Games, performed ad checks for Solitaire GP and Stacky Bird iOS, and tested a shake-to-trigger feature for Stacky Bird GP.

May 21. Finished the Ads Check for Top 50 Games, moved on to Checking High Risk Usernames, compiled UI screenshots for Helix Stack Jump GP, and performed ad checks for Piano Tiles 2 iOS.

May 22. Completed a batch of Checking High Risk Usernames, started researching a specific mechanic across tested apps and games, and created UI screenshots in various languages for Mr Jump iOS.

Special Project Development

May 18. Continued reading the remaining portions of the feasibility study.

May 19. Continued working on the remaining portions of the feasibility study.

May 20. Started the Financial Feasibility portion of the paper.

May 21. Continued the Financial Feasibility portion of the paper.

May 22. Continued the Financial Feasibility portion of the paper.

Quality Assurance Testing

May 25. Handled Priority Tasks on Piano Tiles 2 GP, finding and reporting three UI bugs, and Mr Jump iOS, finding no issues.
 May 26. Handled Priority Tasks on Piano Tiles 2 iOS, finding and reporting six UI bugs, and Pictoword GP, finding no issues.
 May 28. Handled Priority Tasks on Snake.io GP, finding no issues, and Stacky Bird GP, running usual tests plus ad checks and reproducing a UI bug.
 May 29. Handled a Priority Task on Piano Tiles 2, focused on the Live Event, finding and reproducing one UI bug.

Technical Documentation

May 25. Documented the three UI bugs from Piano Tiles 2 GP with reproduction steps.
 May 26. Documented the six UI bugs from Piano Tiles 2 iOS with reproduction steps.
 May 28. Documented the reproduced UI bug from Stacky Bird GP; no issues found for Snake.io GP.
 May 29. Documented the UI bug found during Piano Tiles 2 GP Live Event testing.

Additional Related QA Tasks

May 25. Finished a leftover batch of Checking High Risk Usernames and started another, continued researching a specific mechanic across tested apps and games, and volunteered to take UI screenshots for Pictoword iOS.
 May 26. Completed a batch of Checking High Risk Usernames and started another, still ongoing.
 May 28. Audited banner ads, monitoring and recording required details.
 May 29. Finished the banner ads audit, continued a batch of Checking High Risk Usernames, and rechecked and confirmed a requested part of the Top 50 ads check.

Special Project Development

May 25. Started the Economic Feasibility portion of the paper.
 May 26. Continued the Economic Feasibility portion of the paper.
 May 29. Polished the Economic Feasibility portion of the paper and began the final recommendations.

TASK	Quality Assurance Testing Technical Documentation Additional Related QA Tasks Special Project Development	SHIFT/TIME	7:00 AM to 4:00 PM 1:00 PM to 5:00 PM

Quality Assurance Testing

June 1. Handled a Priority Task on Word Beach Amazon, running usual checks with no issues found.
 June 2. Handled Priority Tasks on Piano Tiles 2 iOS, finding two bugs, Stacky Bird iOS, finding one UI bug, and Word Beach GP, finding no issues.
 June 3. Handled Priority Tasks on Watch Pet GP, finding no issues, and Town Heroes GP, reproducing an already-reported mechanical crash bug.
 June 4. Handled Priority Tasks on Snake iOS CN, finding, reproducing, and reporting a UI bug, and on Solitaire iOS, The Moron Test iOS, and Banana Bunch iOS, finding no issues.
 June 5. Handled Priority Tasks on WatchPet iOS and Word Beach iOS, running usual tests plus ad checks with no issues found.

Technical Documentation

June 1. Documented a UI bug found during MicroTown.io GP testing; no issues found for Word Beach Amazon.
 June 2. Documented three bugs from Piano Tiles 2 iOS and Stacky Bird iOS with reproduction steps; no issues found for Word Beach GP.
 June 3. Documented the reproduced mechanical bug from Town Heroes GP; no issues found for Watch Pet GP.
 June 4. Documented the UI bug from Snake iOS CN; no issues found for Solitaire iOS, The Moron Test iOS, or Banana Bunch iOS.
 June 5. No issues found for WatchPet iOS or Word Beach iOS during testing.

Additional Related QA Tasks

June 1. Continued a batch of Checking High Risk Usernames and performed Weekly GPP Testing, finding and reproducing one UI bug on MicroTown.io.
 June 2. Continued a batch of Checking High Risk Usernames.
 June 3. Finished a batch of Checking High Risk Usernames and started a new one, and confirmed and resolved a fix for a previously reported bug.
 June 4. Continued a batch of Checking High Risk Usernames.
 June 5. Finished a batch of Checking High Risk Usernames and started a new one.

Special Project Development

June 3. Continued polishing the Final Recommendations portion of the paper.

TASK	Quality Assurance Testing Technical Documentation Additional Related QA Tasks Special Project Development	SHIFT/TIME	7:00 AM to 4:00 PM

Quality Assurance Testing

June 29. Handled Priority Tasks on Mr Jump GP, running usual tests plus a feature check, and Solitaire iOS, running usual tests plus ad checks.

June 30. Handled Priority Tasks on Snake Arcade iOS, reproducing two already-reported UI bugs, and Snake GP, finding no issues.

July 1. Handled a Priority Task on Snake.io Amazon, running usual tests plus recording fresh-install launch time, with no issues found.

July 2. Handled a Priority Task on Piano Tiles 2 across GP, iOS regular, and iOS arcade, running usual tests plus Live Event stability testing, with no issues found.

July 3. Handled a Priority Task on Solitaire GP across two devices, running usual tests plus ad checks, with no issues found.

Technical Documentation

June 29. No issues found across the Mr Jump GP and Solitaire iOS priority tasks.

June 30. Documented the reproduced UI bugs from Snake Arcade iOS; no issues found for Snake GP.

July 1. No issues found during Snake.io Amazon testing, with fresh-install launch time recorded.

July 2. No issues found across all three Piano Tiles 2 versions tested, including Live Event stability.

July 3. No issues found during Solitaire GP testing.

Additional Related QA Tasks

June 29. Finished a batch of Checking High Risk Usernames and performed Weekly GPP Testing on Snake.io, Stacky Bird, and Piano Tiles 2.

June 30. Finished and submitted internship project paper portions to the supervisor, and ran Scheduled Testing on Snake GP, Watch Pet iOS, Snake Web, and Piano Tiles 2 Amazon.

July 1. Started a batch of Checking High Risk Usernames, ran Scheduled Testing on Mr Jump GP, Stacky Bird CrazyGames, and Stacky Bird iOS, and recorded and submitted gameplay videos of the first four levels of Piano Tiles 2 GP.

July 2. Ran Scheduled Testing on Mr Jump iOS, Stacky Bird GP, and Pictoword GP, and finished a batch of Checking High Risk Usernames.

July 3. Ran Scheduled Testing on Snake CrazyGames, Snake Web, Watch Pet GP, Piano Tiles 2 GP, and Zendoku iOS, and recorded and submitted a first-time user experience video for Snake iOS.

Special Project Development

July 3. Presented the internship final project; revisions still pending.
